

## [Guide Line]

1. After Installation, go to localhost:3000/ then, you will be able to see main page for user selection.
2. If Admin is selected, it is acceptable for all menus.
3. On the other hand if Employee is selected, only the approved employee can enter "Employee menu"

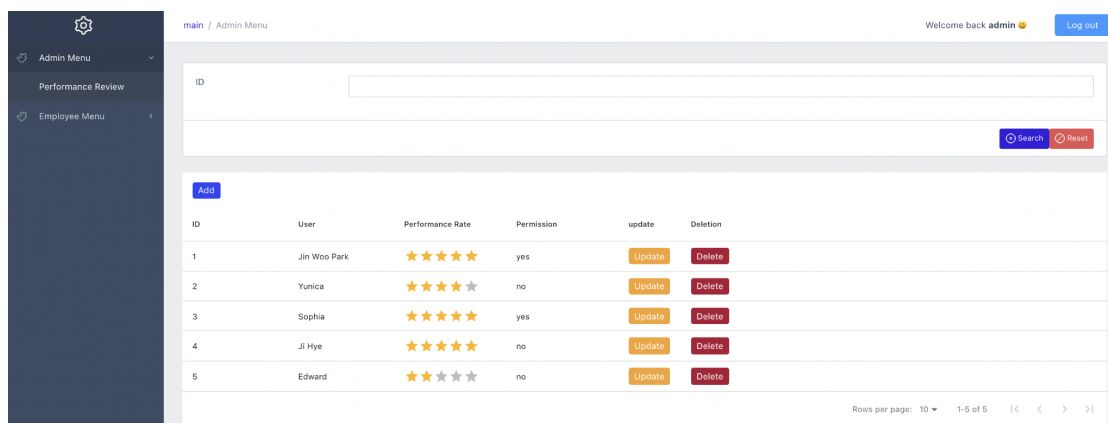

## 4. In this Admin menu, you can test the requirements below

\* Add/remove/update/view employees → There are add, update, delete buttons with Employee List

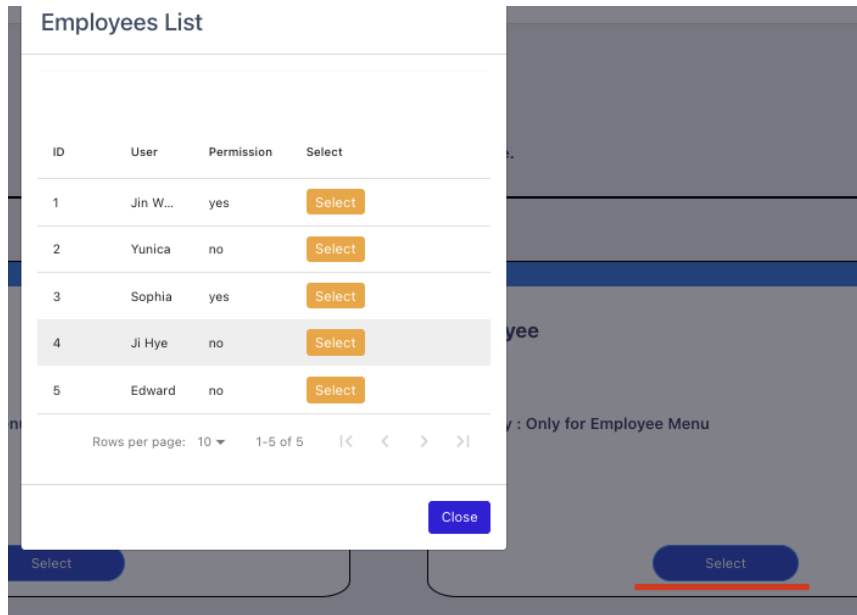

\* Add/update/view performance reviews → same as above, There are add, update buttons and performance reviews are shown as star rating.

\* Assign employees to participate in another employee's performance review → click add or update button then there is permission trigger button.

## 5. To get Employee Menu(User Feedback), select Employee from the modal below.

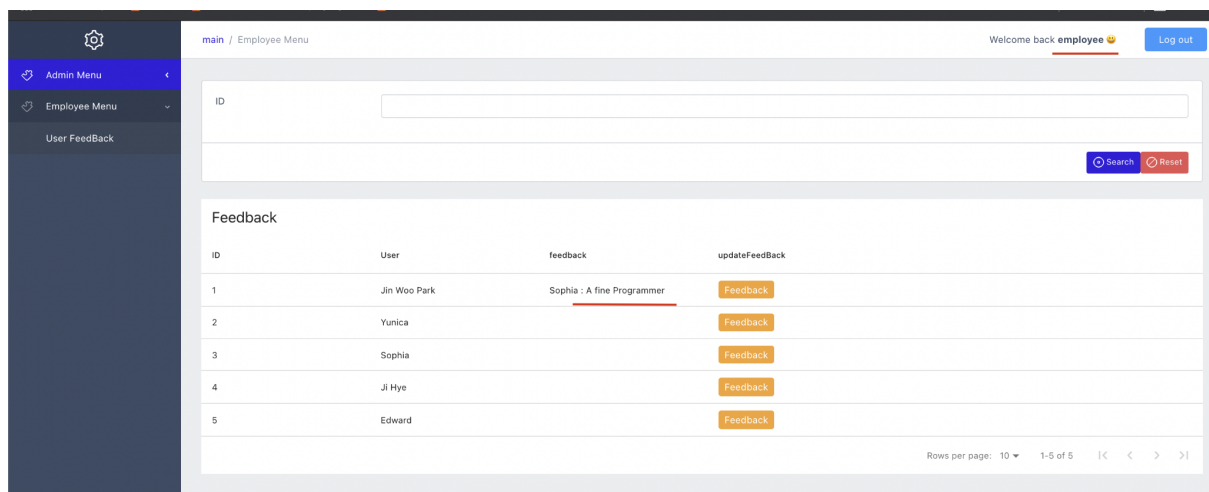

Only the approved Employees and Admin are able to use the Feedback menu.

6. Here is the Feedback menu, in this menu you are able to test the requirements below.

- \* List of performance reviews requiring feedback → table data with feedback

- \* Submit feedback → click Feedback button and write some feedback

Thank you

Best Regards
